# Android™ & Applications
I picked up the wrong language for the system during the startup wizard, how can I get the device in my language?

To modify the language, go to **Settings** (or). In **Settings**, scroll down

and select . Select **Language**, then the desired language.

If you want to restart the startup wizard, go to **Settings**:

- in **Repair & Formatting** , select Startup wizard

or

- in the section **About the device** , select Start wizard
