Why doesn't ARCHOS Fusion Storage work?

First of all, your device must be compatible with ARCHOS Fusion Storage. Check if the ARCHOS Fusion Storage icon  is visible from the **Settings** .

If your device is compatible but the ARCHOS Fusion Storage icon does not appear in the settings, [update your device](#).

You need a micro-SD card formatted in FAT32. For more information, see this following [question/answer](#).

Last but not least, if ARCHOS Fusion Storage is displayed in the settings but you can't activate it, reboot the device.
