

Bitcoins

Receive Bitcoins

1. In the Electrum window, click on "Receive".

Your receiving address is now displayed.

This is the address on which people have to send bitcoins in order for you to receive them.

Requests

Date	Description	Amount	Status
2018-06-14 10:46	Test payment		

Balance: 0. BTC

You have the possibility to:

- Request a payment
- Describe the payment

Note that this screenshot was done using Testnet (a test blockchain, with fake bitcoins), so addresses will be different.

We recommend using the “description” section, which is a good way to remember your transaction history.

For security reasons, we also recommend you click on the “eye” icon on the right end of the “Receiving address” section. This will display your receiving address and a QR code on your Safe-T mini. We recommend checking that the address on your Safe-T mini matches the one on your computer. The QR codes, however, are not

Bitcoins

supposed to match.

Indeed, your computer screen could be hacked while what's displayed on your Safe-T mini cannot.

Once someone has sent you Bitcoins, you'll be able to see the transaction in the "History" section. The transaction will be unconfirmed at first because it needs to be validated in the Blockchain.

When the first confirmations are received, it will look as follows:

Bitcoins

The screenshot shows a Bitcoin wallet application window. At the top, there is a menu bar with 'File', 'Wallet', 'View', 'Tools', and 'Help'. Below the menu bar, there are tabs for 'History', 'Send', 'Receive', and 'Addresses'. The 'History' tab is active, displaying a table with the following data:

Date	Description	Amount	Balance
2018-06-14 10:52	Test payment	+1.3	1.3

At the bottom left of the window, it displays 'Balance: 1.3 BTC'. At the bottom right, there are several icons: a padlock, a gear, a green circle, and a Bitcoin logo.
