

Installing your wallet

Installing the Safe-T Bridge software

It is required to install the Safe-T Bridge to make the connection between your Safe-T mini and your Web Browser.

1. Go to www.safe-t.io.
2. In the platform tab, select the operating system of your computer.
3. Click Download Safe-T Bridge.
4. At the end of the download, click the file `safe-t-bridge-1.0.2-win32-install` to install it.
5. When the installation is complete, reload the Web page.

Now you can connect the Safe-T mini to your computer using the USB cable.
