

# First things to know

## How to transfer a file on my device?

According to your device and its features, you have many possibilities to transfer a file:

- by [connecting your device to a computer](#),
- by [connecting a peripheral device to the USB host port of your device](#)
- by downloading through the Web browser of your device. The file will be available in the Download folder
- using [WiFi](#) / [Bluetooth®](#) / [Android Beam](#) or [HotKnot](#)
