

Helium Series

How to reinitialize my ARCHOS 70b Helium ?

This process is recommended for your device if : it is frozen, it doesn't turn on or you are experiencing a software issue. It will allow you to perform a low level format on your device. Thus all the data will be deleted, you won't be able to retrieve them. We strongly recommend to back them up first. Keep in mind that your device's battery must be charged enough to perform this operation.

Since Android™ 5.0, your device is linked to your Google™ account. If you reset your device from the recovery menu (method 2), you will have to set the same Google™ account you filled in the last wizard. If you reset your device in order to resell it, please use the method 1.

1. If you can have access to the Android™ interface
 - a. Select the Settings app then select Backup & reset > Factory data reset
 - b. Select "Reset tablet" and confirm
2. If you can't access the Android™ interface
 - a. Turn off the device by using ON/OFF
 - b. While holding Volume + plug the power supply to your tablet
 - c. Kepp holding Volume + and turn on the device
 - d. On the select boot mode screen, select "Recovery mode" using Volume + and confirm with Volume -
 - e. Wait a few seconds until the recovery menu is displayed

Use the volume buttons to navigate and ON/OFF to validate.

If you failed to access to the recovery menu, please start again from the

Helium Series

beginning.

- a. Select "Wipe data/factory reset" and validate to restore your device to its default settings.
- b. Select "Yes -- delete all user data" and validate to remove all the user data.
- c. Select "Reboot system now" and validate to reboot the device.

Your device has now been reinitialized. To download and install the original content of your tablet, please see the [following FAQ](#).
