

Neon Series

How to reinitialize my ARCHOS 70b Neon ?

This process is recommended for your device if : it is frozen, it doesn't turn on or you are experiencing a software issue. It will allow you to perform a low level format on your device. Thus all the data will be deleted, you won't be able to retrieve them. We strongly recommend to back them up first. Keep in mind that your device's battery must be charged enough to perform this operation.

Since Android™ 5.0, your device is linked to your Google™ account. If you reset your device from the recovery menu (method 2), you will have to set the same Google™ account you filled in the last wizard. If you reset your device in order to resell it, please use the method 1.

1. If you can have access to the Android™ interface
 - a. Select the Settings app then select Backup & reset > Factory data reset
 - b. To delete music, photos and other user data, you must erase the internal SD card. Tick "Erase storage"
 - c. Select "Reset the tablet" and confirm
2. If you can't access the Android™ interface

Step 1

- a. **Turn off the device by using ON/OFF**
- b. **Hold the ON/OFF button for 2 seconds then release it. The screen shall remain off.**
- c. **Then press immediately the Volume + button until the device turns on.**

Neon Series

Wait a few seconds, the select mode menu will be displayed.

- d. Use the Volume + button to navigate and select the Recovery mode option and the Volume - button to confirm.**

Step 2

If you failed to access to the recovery menu, please start again from the beginning.

Use the volume buttons to scroll down and up and the ON/OFF button to validate.

- a. Select "Wipe data/factory reset" and validate to restore your device to its default settings**
- b. Select "Yes -- delete all user data" and validate to remove all the user data**
- c. Select "Reboot system now" and validate to reboot the device**
