

Smartphones & Tablets | Windows™

How can I add a language pack ?

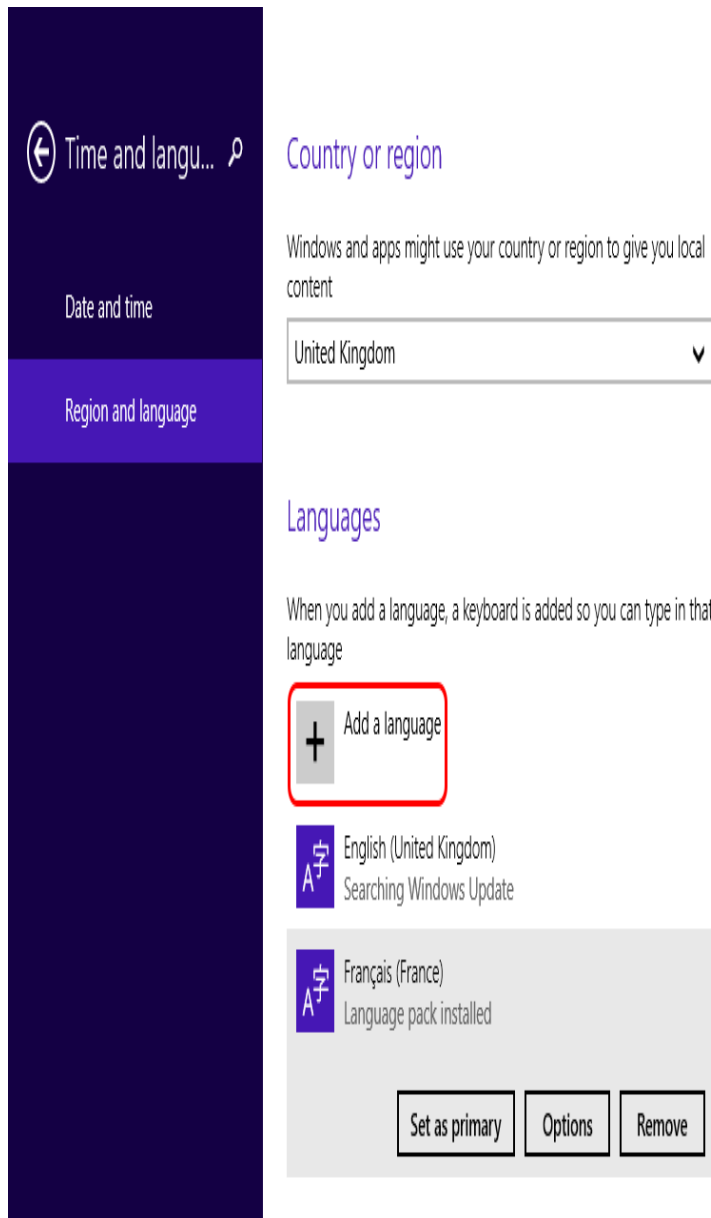

You can add a language pack in your Windows® operating system. Follow these steps :

- On the tablet's homescreen, from the right edge of the screen, slide your finger left and select **Settings > Modify the PC settings**

- Select **Time & language > Region & language**
- In the **Languages** section, select **Add a language** to display all the languages available for your tablet.

Smartphones & Tablets | Windows™

- Select the language to be installed. Once it is added to the list of the languages, select it then choose **Options** > **Download** among the available options.

Smartphones & Tablets | Windows™

Languages

When you add a language, a keyboard is added so you can type in that language

- Reboot the device once the language is set as primary language.

For more information about the updates, go to the [Microsoft support departement](#).
