ARCHOS Connected Self App
How do I add or remove an object from my account ?

Adding an object

To add a new object open the settings area from the main menu then touch

the and then the button to start pairing your object.

Once you have started the pairing process on the application, you will need to start the pairing process on your object (revert to the userguide that came with your object to find the pairing button). Once your object has finished displaying the

pairing logo, and your object has not appeared in the application press the button to restart the pairing process.

Once your object appears, press the picture showing it and wait until it has completed its pairing.

Removing an object

To remove an object, open the settings area then touch the image corresponding to the object that you want to remove.

In the nem meniu that is displayed simply touch the remove button.
