

Music Beany

Is the Music Beany compatible with any Bluetooth® device?

The ARCHOS Music Beany compatible with any device with Bluetooth® 3.0 that can use A2DP protocols (for music controls) and HS Profile (for telephone controls), whatever the operating system.

If you are using a device with an earlier version of bluetooth that does not manage these protocols you may not be able to use the telephone function or the music controls.

Unique solution ID: #1666
