# Specific by device
How to set up the Quick Access button?

Go to the All Apps section and open **Settings** then **Q key**.

To pair a functionality or app to a type of push (quick, double or long) using the quick access button:

1. Turn on the **Q key** feature.
2. Press the left part of the screen.
3. Select the functionality or app to be paired with the push.

You have also access to other settings for the **Q key** through the setting icon located in the upper part of the screen.
