

Power Series

WARNING: imperative firmware update for your ARCHOS 40 POWER

As part of our quality and safety measures, our teams have detected **a volume issue that can cause hearing problems when the smartphone is used with headphones.**

We suggest you stop using your phone until you have downloaded the update.

The update is launched automatically on the device when you turn it on. It is necessary to have a WIFI or 3G connection (unlimited plan) to be able to carry out the update.

If you do not have a WIFI connection to update the product, you can install this update by following these instructions:

- [Download Firmware](#)
- [FAQ: Update](#)
