Bitcoins

Creating a new wallet

After the firmware installation, you can now start using your ARCHOS Safe-T mini.

1. Click Create new wallet.
   Your device is being initialized.
2. Follow the onscreen instructions to set up the device.
3. At the end of the wizard, click End.

Following the instructions for the wizard on www.safe-t.io and on the Safe-T mini screen helps you do the correct setup.

Now your wallet is created and the device's homescreen is displayed.
