

Accounts, E-mail & Contacts

How do I import or export my contacts list?

To import/export contacts, open the **People** app  then press **Menu** (or the corresponding **Menu** button on your device) > Import/Export.

When importing contacts, you will be asked to which account you want to link your accounts.

You can also share your contact list via e-mail, Bluetooth® etc...

To know how the **People** app works, see the following [FAQ](#).
